

GoHighLevel 30-Day Trial Kit

A week-by-week plan and a keep-or-cancel scorecard, so you decide on evidence before the trial ends.

Disclosure: I'm a GoHighLevel affiliate and earn a commission if you sign up through my links, at no extra cost to you. This kit is unofficial and was not made by GoHighLevel. It makes no income promises.

Before you start

- **The terms:** 30-day free trial, credit card required (verified Oct 8, 2026). Usage fees for texts, calls and email can apply during the trial.
- **Day 1:** Find your exact trial end date and how to cancel inside your account. Write the end date on page 2.
- **The goal:** find out whether GoHighLevel fits your work before the trial ends. Most reviewers say it takes 2 to 4 weeks to learn, so use every week.

The 4-week plan

When	Do this	You're done when
Week 1 Days 1-7 Set up	Create your account and pick ONE real use case: your own business or one client. Build one pipeline with your real stages. Add 5 test contacts and move them through.	You can move a contact through the pipeline and find its full history (email, text, calls, forms) in one place.
Week 2 Days 8-14 Automate	Build one workflow: a form submission triggers a follow-up message and moves the contact to a new stage. Start from a pre-built Snapshot instead of building from scratch.	A test lead submits the form and the whole chain runs without you touching anything.
Week 3 Days 15-21 Funnel test	Build one landing page or funnel step with a form. Compare it with what you use now. Many agencies design pages elsewhere and embed forms, so test that option too.	A test submission lands in your pipeline, and you know whether you'd build pages here or embed forms.
Week 4 Days 22-30 Decide	Review the usage fees you have run up so far. Fill in the scorecard on page 2 and make your decision before the trial ends.	Your keep-or-cancel decision is written down with the date.

If you're stuck at day 14, that's information too. Write down what's blocking you. Needing a lot of help this early is a real cost of the platform, not a personal failing.

Keep-or-Cancel Scorecard

Check a box only if it's honestly true today. Count your checks at day 30.

Day 7	
☐	I can do basic tasks without searching the help docs for each one.
☐	My pipeline matches how I actually work.
☐	I have a clear use case I would really run on GoHighLevel.
Day 14	
☐	One automation runs from start to finish without me.
☐	When something breaks, I can fix it or find the answer in under 15 minutes.
☐	Usage fees so far (texts, calls, email) fit my budget. They are charged on top of the plan.
Day 30	
☐	I would use at least 3 of its tools (CRM, automation, funnels, reviews).
☐	The funnel builder is good enough for me, or I'm fine embedding forms from elsewhere.
☐	I can afford the plan plus usage fees every month. Check the current plan prices before you decide.
☐	I have the time to keep learning it.

Count your checks (10 possible)

8 to 10	Keep going. Choose the plan that matches your real use, and recheck the current prices first.
5 to 7	Not sure. Look at the boxes you left empty. If one is a deal-breaker for you, cancel.
0 to 4	Cancel before the trial ends. A single specialist tool is probably a better fit.

Your dates

Trial ends: _____ Total checks: _____ of 10
